

CamContain™ Bags & Accessories

PVC Change-Out Bags & Accessories

Camfil Bags

Available with various options, Camfil bags meet stringent industry requirements. Bags are constructed of a translucent 8-mil thick polyvinyl chloride that allows service personnel to view progress as filters are changed.

Each bag has an elastic shock cord hemmed into the mouth of the bag to fit securely around housing opening. Every bag is identified on a label attached to the shock cord at the bag opening.

Each bag also includes three glove openings. This additional opening facilitates easier filter handling during change out and provides a convenient used bag removal receptacle.

Camfil offers custom-sized replacement bags for any brand of bag-in/bag-out housing.

PVC bags, and accessories, manufactured under the same quality assurance criteria as the housing.

Banding Kit

The Camfil banding kit includes a toolbag for storage of all safety related and other items needed to facilitate a filter change.

Security Straps

A polypropylene security strap secures the bag over the bagging ring during the change out process. The security strap includes a reverse-ring and hook- and-loop strips to secure the ends.

Cinching Straps

A polypropylene cinching strap prevents the bag from being drawn into the housing during operation. The strap is tied near the lip of the door opening. Bag slack is stored behind the housing door.

Banding Ties

Banding ties are used to isolate items for disposal from the newly installed bag section and filters. Camfil banding ties have a tensile strength of 100 pounds and are shipped in packages of ten.

Security Strap

Banding Kit

Toolbag with PVC cutter, tie strap gun, poly bag, cinching strap, Tyrap tie straps, stainless worm gear clamps, ratchet, socket extension socket and instruction manual.

Replacement Bags

Replacement bags shall be non-sticking and constructed of 8-mil thick polyvinyl chloride with a yellow translucent, matte finish. A ¼-inch diameter elastic shock cord shall be hemmed into the opening of the bag so that when stretched around the bagging flange, the bag fits securely. The bag shall include three glove ports as an integral component to assist in the filter change-out. Containment bags shall be suitable for continuous operating temperatures of 0-130° F (54° C).

Banding Kit

Manufacturer shall supply a banding kit that includes a storage case, a heavy duty tie-banding gun, PVC bag cutting shears, a 13" cinching hook-and-loop security/ safety strap and ten 100 pound tensile strength banding ties.

Security/Safety Strap

(#) security/safety strap(s) of polypropylene construction shall be included. The strap(s) shall include a reverse-ring and hook-and-loop fasteners on the end to secure strap during change.

Cinching Strap

(#) 13-inch cinching strap(s) of polypropylene construction shall be included.

Banding Ties

(#, multiples of 10) banding ties with a tensile strength of 100 pounds shall be included.

Items in parentheses () denote optional selections.

Replace with required quantity.
